

# PocketBook

## Release Notes

# PocketBook InkPad

FW Version	5.11
Localization	World Wide

December, 3 2015

# Implemented:

## Readers:

1. Page flipping became more user-friendly in EPUB, PDF and FB2 formats.
2. Processing of the PDF-formatted books was improved. Now the PDF files that contain loads of illustrations can be opened and flipped more quickly.
3. Full screen mode was added. It can be set for text (EPUB, FB2 etc.) and fixed (PDF, DJVU) files separately.
4. Common font settings are applied for all text formats. Once one sets a font for a particular book, the same font settings will be applied to all the book formats.
5. Edit the search query while searching a book.
6. Highlighting of the current book orientation while processing the Rotate menu.
7. GUI (Graphical User Interface) of book menu was enhanced. Now the current chapter is highlighted in the book's table of content.
8. Margins calculation mechanism was improved. Now there will be no more unused extra space at the bottom of a book page.
9. Now Reading Settings menu allows one to adjust Font size more accurately.
10. Support of Dyslexic font was added.

## Library:

1. Library application performance was enhanced. Now one can easily work with a large number of books
2. Scrolling through the booklist became smoother.
3. Quick navigation between the top and the bottom of a book list.
4. Insensitive search was added.

## Book Store (BookLand):

1. Now one can review a fragment of a book in Purchase menu for free.
2. The process of book purchase got more convenient

## Settings:

1. GUI of Settings application was enhanced. Now at the top of the reader's screen one can access various branches in different ways
2. Automatic time synchronization was added.
3. User-friendly Book Store authorization (registration procedure) was added.
4. Now one can easily go back from the Settings menu to the Main application.

**Settings:**

1. GUI of Settings application was enhanced. Now at the top of the reader's screen one can access various branches in different ways
2. Automatic time synchronization was added.
3. User-friendly Book Store authorization (registration procedure) was added.
4. Now one can easily go back from the Settings menu to the Main application.

**Browser:**

1. Application performance was enhanced.

**Other:**

1. General Device performance was improved.
2. User-friendly setup wizard which starts during firmware update or after factory reset.
3. Procedure of Wi-Fi connection was enhanced. Now there is no need to turn off Wi-Fi to save battery power. Wi-Fi-module automatically goes into power saving mode, when there is no transmission of information via the interface. Set up the connection to an access point of Wi-Fi once. It will connect one automatically whenever there will be a need to access the network.
4. The process of firmware update displays as a graphical interface instead of the text mode that used to be in the previous versions.
5. Ability to remove events from Desktop for last opened and last added books.
6. The count of notifications is displayed now on status bar.
7. Synchronization process display window became more convenient (for PocketBook Sync, SendToPocketBook, Dropbox services).
8. Increasing of the file system scanner speed (indexing of books in Library application now runs two times faster).
9. Macedonian localization added.
10. Multiple minor enhancements.

## Fixed:
